How To Make The Ultimate Rebatch Soap Base

THE RECIPE

Ingredients:

- 66 oz. Organic Coconut Oil
- 10 oz. Food Grade Sodium Hydroxide
- 25 oz. Distilled Water

Additional Items:

Vinegar, Old Towels or Paper Towels

Safety Gear:

Goggles, Rubber Gloves & Vapor Mask. see safety page here.

Equipment:

- 2-gallon plastic bucket with lid
- 1-gallon plastic container for mold
- Plastic wrap to cover the inside of the mold
- Immersion Blender
- Scale for weighing ingredients
- Pot for measuring and melting fats
- Spatula

Instructions:

1. Prepare the mold, line with plastic wrap and set aside.
2. Measure the coconut oil into pot and put on low heat to melt.
3. Measure the distilled water into the plastic bucket.
4. Place bucket with water in the sink.
5. Measure the lye and add it to water bucket in the sink.
6. Stir lye crystals into the water and cover lye water with the lid .
7. Add melted fats to lye water and blend till it traces...
8. Pour soap batter into prepared mold, set filled mold in an out of the way place to set up.
9. Rebatch soap is ready to use as soon as it has set up and cooled, cure after rebatching.
